

Benefits

Both attorneys and the court benefit from the new capabilities available with the Internet Credit Card module.

Attorney benefits

Attorneys can:

- Pay filing fees with a credit card over the Internet at any time.
- Review their Internet credit card transaction payment history.
- Review any outstanding payments due to the court.
- Request online payment of unpaid balances.

NOTE Credit card payments presented at the clerk's office must continue to be made conventionally. Since the court's front CM/ECF counter terminals are connected to the judiciary's Data Communications Network (DCN), these computers can not be used to make Internet credit card payments.

Court benefits

The court can:

- Generate a variety of reports for Internet credit cards.
- Automatically docket the Internet credit card receipt number when fees are paid on-line.
- Eliminate the following time-consuming tasks:
 - Maintaining and securing attorney credit card numbers
 - Manually posting fee payments
- Reduce accounts receivable.
